Return Wings

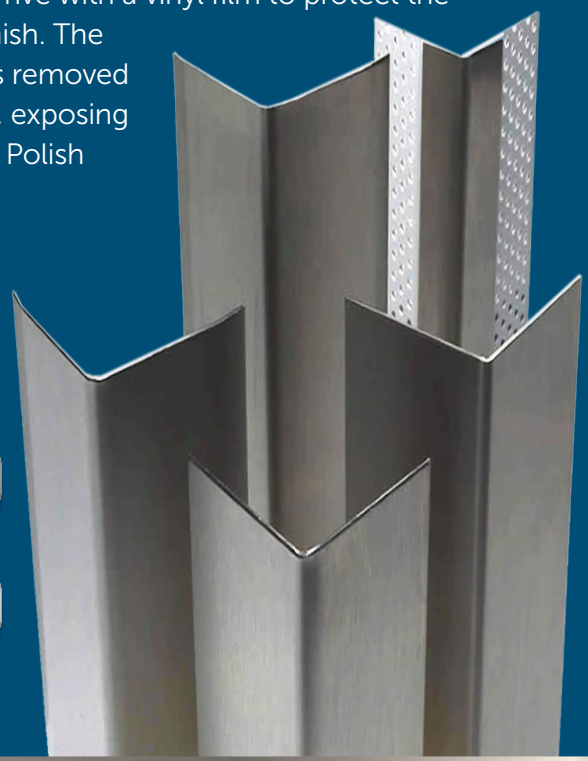

$\frac{3}{8}$ " Return Wings Wings & Holes Wings & Counter Sunk Holes

Why are our corner guards the best?

Primarily, because we are the manufacturer; and therefore we have total control over every facet of our product — from raw material and fabrication, to production and packaging. Quality-control occurs at every step of the fabrication process at our factory in Fort Myers, Florida From inspection of our USA mill-sourced raw materials right up through packaging, ensuring the highest quality.

Need more convincing?

We use only the highest-quality, commercial, architectural-grade, Type 304L stainless steel, with no sharp edges — our corner guard edges are smoothly deburred. Plus, our corner guards arrive with a vinyl film to protect the beauty of the finish. The protective film is removed after installation, exposing the stunning #4 Polish Brushed Finish.
